

Indian Hills General Improvement District
Publication Policy of District Newsletter

The “Neighborhood News” has been a newsletter printed by the District and distributed to its resident population for a number of years. The newsletter is distributed to its residents for significant events, or for general news as to the status of District development and improvement efforts, or as a vehicle to encourage the collection of residents’ opinions on matters before the Board of Trustees. Publication and distribution of the newsletter is routine which has reached a volume of about 2,000 copies of an issue when published. The District has adopted a publication policy for the District’s newsletter as:

It shall be the policy of the District

1. to publish the “Neighborhood News” on a monthly basis which will be included on the monthly water/sewer bills.
2. the theme and purpose of the newsletter to be an informative instrument of the District, through which information as to District issues, developments, improvements, on-going activities, and events can be supplied to the resident population, and through which resident opinion on issues can be solicited or encouraged to be provided to the Board.
3. to provide the distribution without specific separate cost to residents but rather to absorb the costs of these periodic publications within the tax-supported general fund of the District.
4. to use the addresses of residential and commercial water/sewer customers for the mailings of the distributions, and, within reason, accept requests for copies of a distribution to be supplied, by mail or electronically, to other requesting organizations or parties.
5. to refuse requests for paid, commercial advertising or unsolicited requests for publication of print material.
6. to refuse requests for paid political advertisement.
7. review by a Trustee of the Board is required before distribution.
