WILL SERVE POLICY (Sewer/Water)

Indian Hills General Improvement District provides water and / or sewer services within or near the District boundaries. These services are managed through issuance of will serve letters which describe the address and service to be provided.

Section 1 – Will Serve Letters

A will serve letter is an agreement between the District and an owner or developer to provide water and / or sewer service. A will serve letter is issued by the District outlining the conditions of service to a particular parcel. The will serve letter constitutes the District's conditional commitment to serve new developments and to ensure that sufficient capacity is available to provide such service. A will serve letter will be considered by the District once requested by the property owner and will expire one year after the date of issuance. If substantial progress is being made by the owner regarding the development, the will serve may be extended with Board approval.

Section 2 – Eligibility & Criteria

1. All property to receive new service must be included in the District's boundary.
2. Any property owner(s) requesting services outside of the District's existing boundary must request annexation to the District in accordance with the annexation policy.
3. The District must have the actual capability to provide the requested services to the property.
4. New parcel or subdivision maps within the District boundary may require dedication of water rights to provide water for all new and expanded uses.

Section 3 – Connection Fees

1. Water Connection Fees as indicated on the District's Fee Schedule are applicable to all new connections, as well as to changes in connection size.
2. The Single Family Residence Sewer Connection Fees are set forth on the District's Fee Schedule.
3. Commercial / Industrial facilities requesting a will serve letter must comply with the District's Commercial / Industrial Sewer Service and Water Service Policies. Both policies specify certain formulae and considerations involved in setting

commercial and industrial connection fees and monthly service fees for sewer and / or water service provided by the District.

4. An EDU (Equivalent Dwelling Unit) determination will be conducted by the District's Engineer for Multi-Family, Residential Development & Commercial / Industrial will serve requests in order to establish an accurate connection fee and water right dedication.
5. Current Board approved connection fees must be paid in full at the time connection is requested.

Section 4 – Request for Water / Sewer Will Serve Form & Fee Schedule

1. Any person or entity requesting a will serve shall complete in detail and submit to the District a "Request for Water / Sewer Will Serve" Form. (*Attachment A*)
2. The requester(s) will be required to pay will serve fees for the District's costs associated with reviewing and evaluating the will serve request. Will Serve fees must be paid in full when the "Request for Water / Sewer Will Serve" Form is submitted. (*Attachment A*)
3. Upon submission of payment and completed forms the District will review the request for will serve. The District may require the requester to furnish the District with such other information as the District deems pertinent. If there are any additional District incurred administrative, engineering or legal costs to evaluate and process the request for will serve, the District will provide an estimate thereof, all of which must be paid upon presentation. A will serve letter will not be issued if any required fees are unpaid.
4. The District will not provide water or sewer service to the property(s) in the event of non-payment of any fees. Upon payment, the District operator will proceed with the appropriate service installation.

All service line and/or water main installations must be performed by District staff or by a licensed contractor subject to improvement plan approval by the District and subject to the District's "Inspection and Testing Policy" as adopted August 11, 1999.
